

Sandhya Lodhi

Full Stack Developer (MERN Stack) | React.js | Node.js | MongoDB | Express.js

✉ isandhya891@gmail.com | 📞 8595451116 | 📍 Greater Noida | 🌐 Sandhya Rajput | 📧 sandhya8595

Profile Summary

Motivated B.Tech CSE (AIML) student at KCC Institute of Technology & Management (CGPA: 8.84) with hands-on experience building full-stack web applications using the MERN Stack and AI-powered platforms using LangChain, RAG, and Google Gemini API. Skilled in designing RESTful APIs, integrating vector databases (Pinecone), and deploying containerized applications with Docker. Also experienced in Python-based data analysis using NumPy, Pandas, Matplotlib, and Seaborn. Seeking an internship or entry-level role in full-stack or AI development.

Education

KCC Institute of Technology & Management, Greater Noida 2023 – 2027
B.Tech in Computer Science & Engineering (AIML) | Current CGPA: 8.84

SBMIC, Fatehpur 2022
Senior Secondary Education | Class 10th: 85% | Class 12th: 87%

Skills

- **Frontend:** HTML, CSS, JavaScript, React.js, Bootstrap **Backend:** Node.js, Express.js, RESTful APIs, Socket.IO
 Database: MongoDB, Mongoose
- **Generative AI & LLMs:** Prompt Engineering, RAG, Agentic AI, LangChain, Pinecone, Embeddings, Context Engineering, AI Agents, Google Gemini API
- **Data Analysis:** Python, NumPy, Pandas, Matplotlib, Seaborn
- **Cloud & DevOps:** Docker, CI/CD **Languages:** C, C++, Python, JavaScript **Tools:** Git, GitHub, VS Code, Postman, Antigravity IDE
- **CS Fundamentals:** OOPs, DSA, DBMS, Operating Systems, Computer Networks

Projects

RouteFlow – Team Project (2 Members) *Real-Time Smart Bus Tracking System (MERN + Socket.IO)*

- Built a MERN Stack-based real-time bus tracking web app supporting 50+ routes, enabling commuters to view live bus locations on a map, check estimated arrival time (ETA), and find buses by source location, even between stops.
- Designed and integrated RESTful APIs for Driver (update bus details & share live location), User (track buses & submit complaints), and Admin (monitor buses & resolve issues) modules, reducing frontend data-fetch time by 40%.

Airbnb Clone *Full Stack MERN Application*

- Developed a full-stack property rental platform (MERN) with JWT-based authentication, location-aware search, and booking management for 100+ mock listings.
- Built 10+ RESTful API endpoints handling CRUD operations for users, properties, and bookings.
- Live Demo: airbnb-project-2-1npu.onrender.com

AI Resume Analyzer *AI-Powered Resume Evaluation Platform*

- Built an AI-powered resume evaluation platform using RAG architecture (LangChain + Pinecone + Google Gemini API) delivering ATS scoring, skill-gap analysis, and personalized recommendations.
- Reduced feedback generation time to under 5 seconds using vector embeddings for semantic search across 100+ resume chunks.

Technical Achievements

- Solved 150+ Data Structures & Algorithms problems on LeetCode.
- Achieved a 4-star rating on HackerRank (Problem Solving).
- Actively practice coding and problem-solving on GeeksforGeeks (GFG) and other coding platforms.
